

CAREER OBJECTIVE

Aspiring Software Engineer and Front-End Developer skilled in React.js, Tailwind CSS, JavaScript, and modern web technologies. Passionate about Artificial Intelligence and Machine Learning, with a strong interest in building scalable, user-centric, and intelligent digital solutions.

WORK EXPERIENCE

Software Development Engineering (Web) • Internship

Apr 2026 - Present

Wealtharth Technologies LLP., Virtual

- Designed and developed scalable, responsive, and user-centric web applications using React.js, Tailwind CSS, and modern frontend development practices.
- Built dynamic UI components, optimized application responsiveness and performance, and implemented seamless animations and interactive interfaces to enhance user experience.
- Collaborated within an agile development environment following component-based architecture, reusable design principles, and contemporary web standards for maintainable frontend solutions.

EDUCATION

Bachelor of Computer Engineering, Computer Science & Engineering

2023 - 2027

NMIMS Shirpur

CGPA: 2.98/4

Senior Secondary (XII), Maharashtra State Board Of Secondary And Higher Secondary Education

2023

Science

H.R.Patel Higher Secondary School , Shirpur

Percentage: 85.53%

Secondary (X), Maharashtra State Board Of Secondary And Higher Secondary Education

2021

H.R.Patel Kanya Madhyamik Vidyalay,shirpur

Percentage: 96.70%

TRAININGS / CERTIFICATIONS

Mathematics-Basics To Advanced For Data Science And GenAI

Apr 2026 - May 2026

KRISHAI Technologies Private Limited Via Udemy, Virtual

Build Strong math foundation with linear algebra,stats,probability,differential calculus for mastering data science

UI/UX

Dec 2025

Being Ambitious, Virtual

Completed foundational training in Shopify development through Being Ambitious, gaining practical experience in building and customizing demo e-commerce stores on the Shopify platform. Worked on storefront design, theme customization, product management, responsive UI development, and basic store optimization while understanding core concepts of e-commerce workflows, user experience, and digital store architecture.

PORTFOLIO

[GitHub link ↗](#)

PROJECTS

This was my first project, developed in C, applying core Data Structures and Algorithms concepts. It uses a Binary Search Tree (BST) for efficient searching, insertion, and deletion of student records based on roll numbers, ensuring average-case time complexity of $O(\log n)$. In parallel, a Linked List maintains the insertion order, allowing sequential access for tasks like printing or chronological tracking. The system also incorporates Stacks for temporary data handling and reversals. This combination of data structures offers both performance and flexibility, making the system suitable for tasks like fast record lookup and ordered data processing.

SKILLS

- HTML
- CSS
- JavaScript
- C++ Programming
- C Programming
- Java

EXTRA CURRICULAR ACTIVITIES

- I volunteered at a Primary Health Care Centre (PHC) for 21 days, working with doctors and ASHA workers. I assisted in health awareness drives, routine check-ups, and patient coordination. This experience gave me insight into community healthcare delivery and improved my teamwork and communication skills in a real-world setting.
- At NMIMS Shirpur, I am the co-founder and marketing head of Avinya, it emphasizes IoT innovation and machine learning. My role involves promoting our mission and shaping the club's direction, strengthening both my technical and leadership skills.
